iN2-DD2P

ProFusion Beverage Dispensing System

N₂ and CO₂ Beverages on Tap

- Plug and play; factory assembled system.
- The ProFusion system uses one cold keg of cold brew coffee, tea or your craft beverage of choice and dispenses two different style beverages from a single keg.
- Nitrogenated or lightly carbonated, and Still Beverage on Tap.
- Simple set-up: one keg connection and one gas connection.
- ProFusion Injector equipped with two secondary regulators, feeding both the keg and injector.
- Built in stainless steel particulate filter, 50 micron, washable and reusable.
- Optional custom tap handles available.
