

Tech Tips

Protect your floors & cabinets from leaks!

How to Install the Leak Block Sensor with Auto Shut-off (CR-LBS10JG):

1. Install the 3/8" fittings to the solenoid valve inlet and outlet ends. The thread of solenoid valve is 1/2" BSP male. Then connect a 3/8" OD tube from the angle stop to the inlet fitting on the solenoid valve (indicated by position of the arrow). Then connect a 3/8" OD tube from the outlet end of the solenoid to the water treatment system that is feeding your Crysalli CP2000 unit.
2. Put the 9V battery in the control unit and activate it by holding the check/reset button for 4 seconds (see operation instructions for more details).
3. Place the control unit next to your Crysalli unit, ideally between the filter system and chiller.
4. Turn on water and check for leaks at your connection points.

**Can be used with any Crysalli chiller system*
