# iN2-DD2P

Like a moment of peace and quiet in the middle of a chaotic afternoon, the smooth richness, deep coffee aroma and color of a Crysalli iN2-DD2P nitro coffee drink will take you to another place. Everyone can use those minutes in time to relax and escape into the ideal beverage, cold brew coffee, nitro coffee or nitro infused tea. Enjoy the moment, enjoy the break, and enjoy your nitro infused beverage from the Crysalli Beverage Systems iN2-DD2P.

Follow this code to view technical specifications for the ProFusion line

*The iN2-DD2P comes as a complete, ready to use system*

## **iN2-TK2P**

Business is booming, customers are flocking to your doors and looking for that unique experience that only your restaurant can provide. How do you elevate this experience to the next level? How do you get your customers to swoon all over again about the uniqueness that is your establishment and you?

Add Crysalli Beverage Systems iN2-TK2P nitro injection device to your existing piece of back bar equipment and begin exploring the world of cold brew coffees, nitro infused drinks and unique beverage offerings that will get your customers talking...again!

# CR-1-iN2

Plato once said...necessity is the mother of invention. At Crysalli Beverage Systems we took that one step further and added that inspiration along with necessity is the mother of invention. Inspired by the desire to create the best beverage experience possible when it comes to cold brew coffee, nitro brew coffee and other nitro infused drinks, we created the iN2 series of nitro injecting equipment. The necessity to have this in a more compact, countertop application inspired us to take this to another level, so we created the Crysalli Beverage Systems CR-1-iN2 countertop nitro injecting beverage dispenser.

Fresh brewed and flash chilled, the CR-1-iN2 eliminates the need for storing bulky kegs in your walk-ins.

Now you know what inspires Crysalli, so the question is, **“How will Crysalli inspire you?”**
